# TABLE OF CONTENTS

## to Volume 73, January–April, 1973

ALLEN, S. L., S. W. FARROW and P. A. GOLEMBIEWSKI, Esterase variations between the 14 syngens of *Paramecium aurelia* under axenic growth ..... 561–573

ASPINWALL, NEVIN, Inheritance of alpha-glycerophosphate dehydrogenase in the pink salmon, *Oncorhynchus gorbuscha* (Walbaum) ..... 639–643

AVIVI, LYDIA and MOSHE FELDMAN, The mechanism of somatic association in common wheat, *Triticum aestivum* L. IV. Further evidence for modification of spindle tubulin through the somatic-association genes as measured by vinblastine binding .. 379–385

BENZ, WENDY C. and HILLARD BERGER, Selective allele loss in mixed infections with T4 bacteriophage ..... 1–11

BRINK, R. ALEXANDER and ELIZABETH WILLIAMS, Mutable R-Navajo alleles of cyclic origin in maize ..... 273–296

CARPENTER, ADELAIDE T. C., A meiotic mutant defective in distribution disjunction in *Drosophila melanogaster* ..... 393–428

CHARLESWORTH, BRIAN and DEBORAH CHARLESWORTH, A study of linkage disequilibrium in populations of *Drosophila melanogaster* ..... 351–359

CHIU, S. M. and P. J. HASTINGS, Pre-meiotic DNA synthesis and recombination in *Chlamydomonas reinhardi* ..... 29–43

CLARK, JIM and O'NEIL RAY COLLINS, Directional cytoxic reactions between incompatible plasmodia of *Didymium iridis* ..... 247–257

CROZIER, R. H., Apparent differential selection at an isozyme locus between queens and workers of the ant *Aphaenogaster rudis* ..... 313–318

DAVISSON, MURIEL T., JAMES E. WRIGHT and LOUISA M. ATHERTON, Cytogenetic analysis of pseudolinkage of LDH loci in the teleost genus Salvelinus ..... 645–658

DICKINSON, HEATHER and JANIS ANTONOVICS, The effect of environmental heterogeneity on the genetics of finite populations ..... 713–735

DONADY, J. JAMES, R. L. SEECOF and M. A. FOX, Differentiation of Drosophila cells lacking ribosomal DNA, *in vitro* ..... 429–434

ELSTON, R. C. and JOHN STEWART, The analysis of quantitative traits for simple genetic models from parental, $F_1$ and backcross data ..... 695–711

ERICKSON, ROBERT T. and JAMES C. COPELAND, Congression of unlinked markers and genetic mapping in the transformation of *Bacillus subtilis* 168 ..... 13–21

FONTDEVILA, ANTONIO, Genotype-temperature interaction in *Drosophila melanogaster*. II. Body weight ..... 125–134

FOSTER, GEOFFREY G., Is the notch locus of *Drosophila melanogaster* a tandem repeat? Correlation of the genetic map and complementation pattern of selected mutations 435–438

GRELL, RHODA F., Recombination and DNA replication in the *Drosophila melanogaster* oocyte ..... 87–108

GUPTA, S. B. and PRATIBHA GUPTA, Selective somatic elimination of *Nicotiana glutinosa* chromosomes in the $F_1$ hybrids of *N. Suaveolens* and *N. glutinosa* ..... 605–612

HANRAHAN, J. P., E. J. EISEN and J. E. LEGATES, Effects of population size and selection intensity on short-term response to selection for postweaning gain in mice ..... 513–530

HARTL, DANIEL L., Complementation analysis of male fertility among the segregation distorter chromosomes of *Drosophila melanogaster* ..... 613–629

HIRAIZUMI, YUICHIRO, BARTON SLATKO, CHARLES LANGLEY and ANNEGRETH NILL, Recombination in *Drosophila melanogaster* male. I. Origin of recombination/meiotic or premeiotic ..... 439–444

HOCH, JAMES A. and JUDITH L. MATHEWS, Chromosomal location of pleiotropic negative sporulation mutations in *Bacillus subtilis* ..... 215–228

HOLDEN, JEANETTE and DAVID T. SUZUKI, Temperature-sensitive mutations in *Drosophila melanogaster*. XII. The genetic and developmental characteristics of dominant lethals on chromosome 3 ..... 445–458

KIGER, JOHN A., JR. and CAROL J. BRANTNER, The inability of yeast transfer RNA to suppress an amber mutation in an *E. coli* system ..... 23–28

LATTER, B. D. H., The island model of population differentiation: a general solution .. 147–157

LATTER, B. D. H., Selection for a threshold character in Drosophila. IV. Chromosomal analyses of plateaued populations ..... 497–512

LUCCHESI, JOHN C. and JOHN M. RAWLS, JR., Regulation of gene function: A comparison of X-linked enzyme activity levels in normal and intersexual triploids of *Drosophila melanogaster* ..... 459–464

MANGE, ARTHUR P. and L. SANDLER, A note on the maternal effect mutants daughterless and abnormal oocyte in *Drosophila melanogaster* ..... 73–86
MARUYAMA, TAKEO, The variance of the number of loci having a given gene frequency 361–366
MERICLE, L. W. and R. P. MERICLE, Resolving the enigma of multiple mutant sectors in stamen hairs of tradescantia ..... 575–582
MITTON, JEFFRY and RICHARD KOEHN, Population genetics of marine pelecypods. III. Epistasis between functionally related isoenzymes of *Mytilus edulis*. Appendix by TIMOTHY PROUT ..... 487–496
NARAYANAN, YAMUNA, The phylogenetic relationships of the members of the *Drosophila robusta* groups ..... 319–350
ORIAS, EDUARDO and MIRIAM FLACKS, Use of genomic exclusion to isolate heat-sensitive mutants in Tetrahymena ..... 543–559
PARMA, DAVID H. and MARLENE SNYDER, The genetic constitution of tandem duplications of the rII region of bacteriophage T4D ..... 161–183
PARRY, DILYS M., A meiotic mutant affecting recombination in female *Drosophila melanogaster* ..... 465–486
PHILLIPS, JOHN P., HUGH S. FORREST and ANIL D. KULKARNI, Terminal synthesis of xanthommatin in *Drosophila melanogaster*. III. Mutational pleiotropy and pigment granule association of phenoxazinone synthetase ..... 45–56
ROBERTS, CHARLES T., JR. and EDUARDO ORIAS, Cytoplasmic inheritance of chloramphenicol resistance in tetrahymena ..... 259–272
ROCKWOOD-SLUSS, E. S., J. S. JOHNSTON and W. B. HEED, Allozyme genotype-environment relationships. I. Variation in natural populations of *Drosophila pachea* ..... 135–146
SANDFAER, JENS, Barley stripe mosaic virus and the frequency of triploids and aneuploids in barley ..... 597–603
SIMCHEN, G., Y. SALTS and R. PIÑON, Sensitivity of meiotic yeast cells to ultraviolet light ..... 531–541
STEWART, JOHN and R. C. ELSTON, Biometrical genetics with one or two loci: the inheritance of physiological characters in mice ..... 675–693
TARTOF, KENNETH D., Regulation of ribosomal RNA gene multiplicity in *Drosophila melanogaster* ..... 57–71
TROSKO, JAMES E. and KATHY WILDER, Repair of UV-induced pyrimidine dimers in *Drosophila melanogaster* cells in vitro ..... 297–302
VARY, PATRICIA S. and BBUCE A. D. STOCKER, Nonsense motility mutants in *Salmonella typhimurium* ..... 229–245
VIG, B. K., Somatic crossing over in *Glycine max* (L.) Merrill: Effect of some inhibitors of DNA synthesis on the induction of somatic crossing over and point mutations .. 583–596
WARD, EDWARD J., Nondisjunction: Localization of the controlling site in the maize B chromosome ..... 387–391
WEIBUST, ROBERT S., Inheritance of plasma cholesterol levels in mice ..... 303–312
WHITE, KALPANA and NOBORU, SUEOKA, Temperature-sensitive DNA synthesis mutants of *Bacillus subtilis*—Appendix: General theory of density transfer for symmetric chromosome replication ..... 185–214
WILKIE, D. and D. Y. THOMAS, Mitochondrial genetic analysis by zygote cell lineages in *Saccharomyces cerevisiae* ..... 367–377
WOLFF, GEORGE L. and HENRY C. PITOT, Influence of background genome on enzymatic characteristics of yellow ($A^y/—$, $A^{vy}/—$) mice ..... 109–123
ZIMMERING, S. and E. B. BENDBOW, Meiotic behavior of asymmetric dyads in the male Drosophila ..... 631–638
ZOUROS, E. and C. B. KRIMBAS, Evidence for linkage disequilibrium maintained by selection in two natural populations of *Drosophila subobscura* ..... 659–674
